

Project Design Phase-II
Data Flow Diagram & User Stories

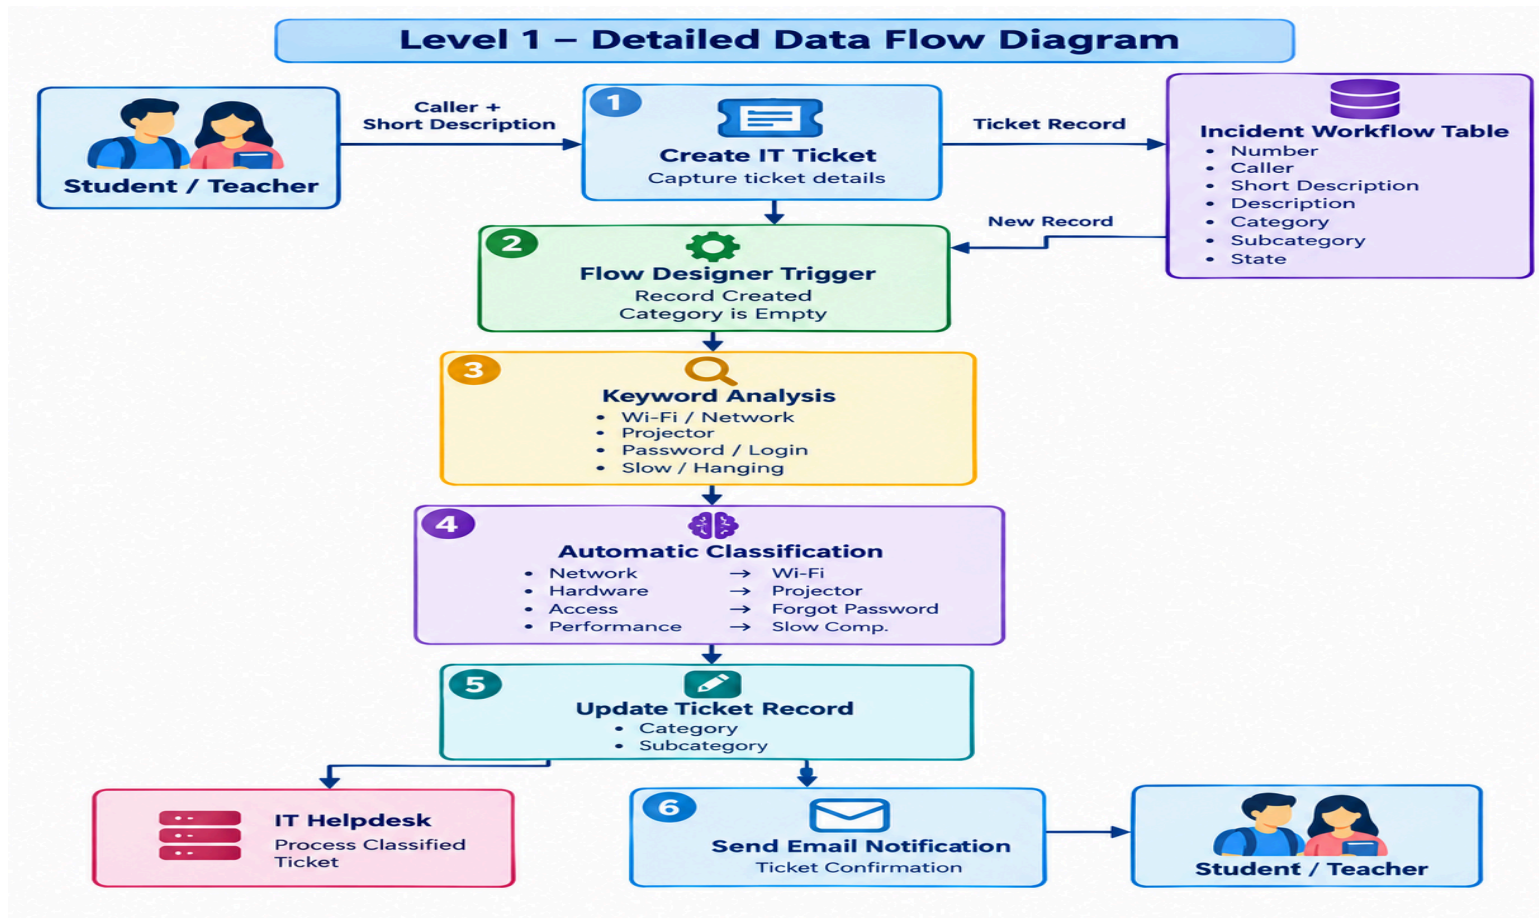

Date	28 September 2026
Team ID	SWTID-2026-2588
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Data Flow Diagrams:

Level 0 – Context Diagram

Level 1 – Detailed Data Flow Diagram

User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Student / Teacher	Ticket Creation	USN-1	As a student or teacher, I can create an IT support ticket by entering my caller information and issue description.	Ticket is successfully created and receives a unique ticket number.	High	Sprint-1
Student / Teacher	Ticket Creation	USN-2	As a student or teacher, I can enter a short description of my technical issue.	Short Description is stored correctly in the ticket.	High	Sprint-1
Student / Teacher	Ticket Creation	USN-3	As a student or teacher, I can provide additional details about my IT problem.	Description is stored correctly in the ticket record.	Medium	Sprint-1
Student / Teacher	Ticket Confirmation	USN-4	As a student or teacher, I receive an email confirmation after creating an IT support ticket.	Confirmation email is sent to the caller's registered email address.	High	Sprint-1
Student / Teacher	Ticket Classification	USN-5	As a student or teacher, I want my Wi-Fi issue to be automatically classified.	Wi-Fi/Network keywords result in Category = Network and Subcategory = Wi-Fi .	High	Sprint-1
Student / Teacher	Ticket Classification	USN-6	As a student or teacher, I want my projector issue to be automatically classified.	Projector keyword results in Category = Hardware and Subcategory = Projector .	High	Sprint-1
Student / Teacher	Ticket Classification	USN-7	As a student or teacher, I want my password or login issue to be automatically classified.	Password/Login keywords result in Category = Access and Subcategory = Forgot Password .	High	Sprint-1

Student / Teacher	Ticket Classification	USN-8	As a student or teacher, I want my slow computer issue to be automatically classified.	Slow/Hanging keywords result in Category = Performance and Subcategory = Slow Computer .	High	Sprint-1
IT Helpdesk Agent	Ticket Management	USN-9	As an IT helpdesk agent, I can view automatically classified IT tickets.	Category and Subcategory are populated correctly when the ticket is opened.	High	Sprint-1
IT Helpdesk Agent	Ticket Management	USN-10	As an IT helpdesk agent, I can process tickets without manually selecting their category and subcategory.	Flow Designer automatically updates classification fields.	High	Sprint-1
IT Helpdesk Agent	Ticket Management	USN-11	As an IT helpdesk agent, I can view the caller and issue information from the ticket.	Caller, Short Description and Description are displayed correctly.	High	Sprint-1
IT Helpdesk Agent	Ticket Routing	USN-12	As an IT helpdesk agent, I can identify the type of issue from the classified category and subcategory.	Correct issue classification is available on the ticket.	Medium	Sprint-2
ServiceNow Administrator	Flow Automation	USN-13	As a ServiceNow administrator, I can create a Flow Designer flow that triggers when a new ticket is created.	Flow triggers when a new Incident Workflow record is created and Category is empty.	High	Sprint-1
ServiceNow Administrator	Flow Automation	USN-14	As a ServiceNow administrator, I can configure keyword conditions in Flow Designer.	Configured keywords correctly identify the supported issue types.	High	Sprint-1
ServiceNow Administrator	Flow Automation	USN-15	As a ServiceNow administrator, I can update Category and Subcategory automatically using Flow Designer.	Matching tickets receive the correct Category and Subcategory.	High	Sprint-1
ServiceNow Administrator	Choice Configuration	USN-16	As a ServiceNow administrator, I can configure dependent Category and Subcategory choices.	Only relevant subcategories are available for the selected category.	High	Sprint-1
ServiceNow Administrator	Notification	USN-17	As a ServiceNow administrator, I can configure an automated email action.	Email is generated and sent to the caller after ticket creation.	High	Sprint-1

ServiceNow Administrator	Testing	USN-18	As a ServiceNow administrator, I can test different types of IT issues.	Wi-Fi, Projector, Password/Login and Slow Computer scenarios are classified correctly.	High	Sprint-2
ServiceNow Administrator	Maintenance	USN-19	As a ServiceNow administrator, I can modify or add classification rules when new issue types are introduced.	Flow can be updated with additional conditions without redesigning the complete system.	Medium	Sprint-2
ServiceNow Administrator	Deployment	USN-20	As a ServiceNow administrator, I can complete and export the project Update Set.	Project Update Set can be changed to Complete and exported as XML.	Medium	Sprint-2

Priority Classification

High Priority

Core features required for the project:

- Ticket creation
- Automatic classification
- Category and Subcategory assignment
- Flow Designer trigger
- Email notification
- Dependent choices
- Testing

Medium Priority

Features that improve usability and future maintenance:

- Detailed ticket information
- Automatic routing
- Flow maintenance

- Update Set deployment

Future Enhancements

The following can be considered for future releases:

- Automatic assignment to IT groups
 - SLA tracking
 - Additional issue categories
 - More keyword combinations
 - Predictive/AI-based ticket classification
 - Ticket priority automation
-
