

Project Development Phase

Model Performance Test

Date	28 September 2026
Team ID	SWTID-2026-2588
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	10 Marks

Model Performance Testing:

S.No.	Parameter	Values	Screenshot
1	Metrics	Regression Model: Not Applicable – no regression model is used. Classification Model: Not Applicable – no machine-learning classification model is trained. The system uses keyword-based classification through ServiceNow Flow Designer. Functional Classification Accuracy: $\text{Correctly Classified Tickets} / \text{Total Test Tickets} \times 100$, based on actual testing results. Test Categories: Network → Wi-Fi; Hardware → Projector; Access → Forgot Password; Performance → Slow Computer.	
2	Tune the Model	Hyperparameter Tuning: Not Applicable – no ML model or hyperparameters are used. Validation Method: Functional test-case validation using sample incident tickets and verification of the expected Category and Subcategory. Rule/Flow Tuning: Keyword conditions and Flow Designer branches can be modified when required.
