

Project Development Phase

Model Performance Test

Date	28 September 2026
Team ID	SWTID-2026-2588
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	10 Marks

Model Performance Testing:

S.No.	Parameter	Screenshot / Values
1	Data Rendered	Incident ticket data – Number, Caller, Category, Subcategory, Short Description, Description, State, Assigned Group, Assigned To. 
2	Data Preprocessing	Ticket details are entered into the Incident WorkFlow table. Category and Subcategory fields use dependent-choice logic. 
3	Utilization of Data Filters	Category is checked for empty value, followed by keyword-based classification using Wi-Fi, Projector, Password/Login, and Slow/Hanging.

Choice List Specification **Default Value**

Displays a list of suggested values in a Choice list. In the Advanced view you can select the Choice table and the Choice field to take choice values from, plus a Dependent field.

Choice: Dr dropdown with - None -
