

Ideation Phase

Brainstorm & Idea Prioritization

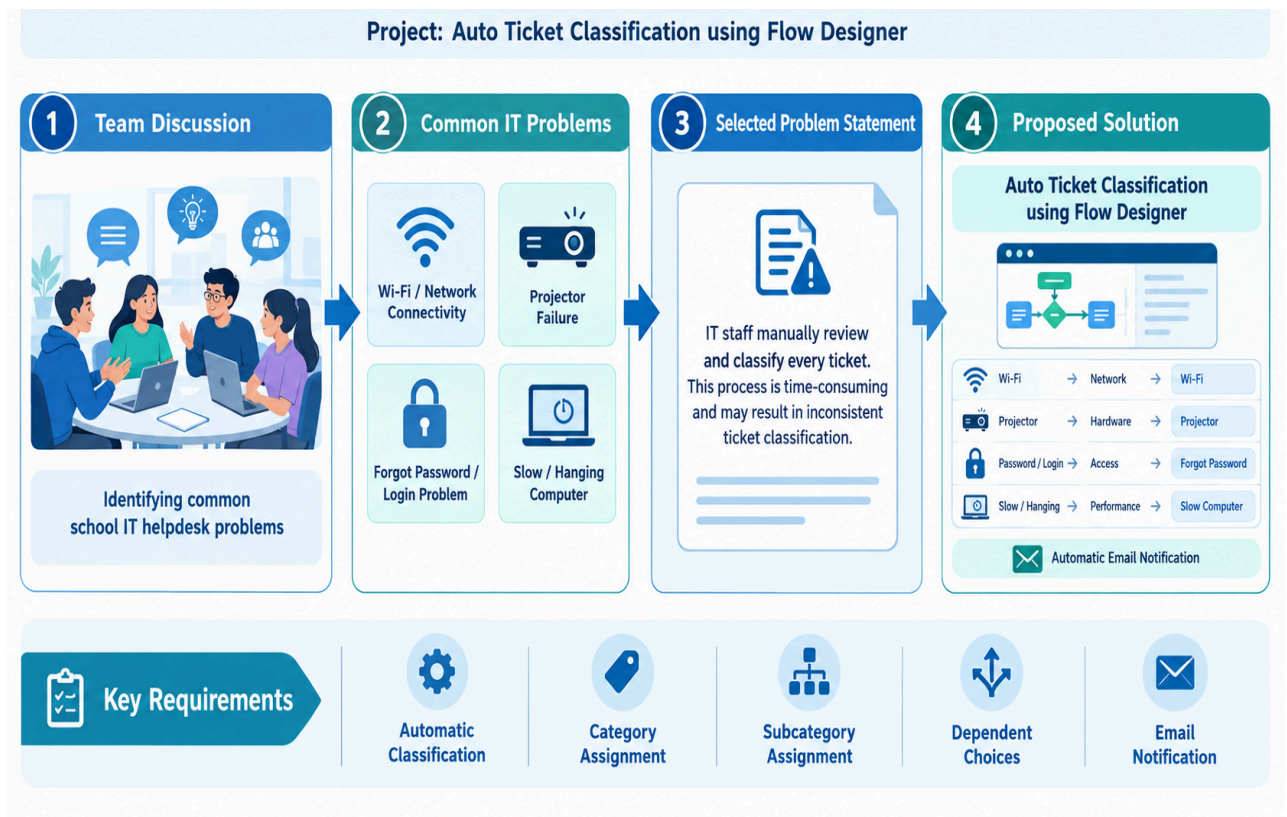

Date	28 September 2026
Team ID	SWTID-2026-2588
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization :

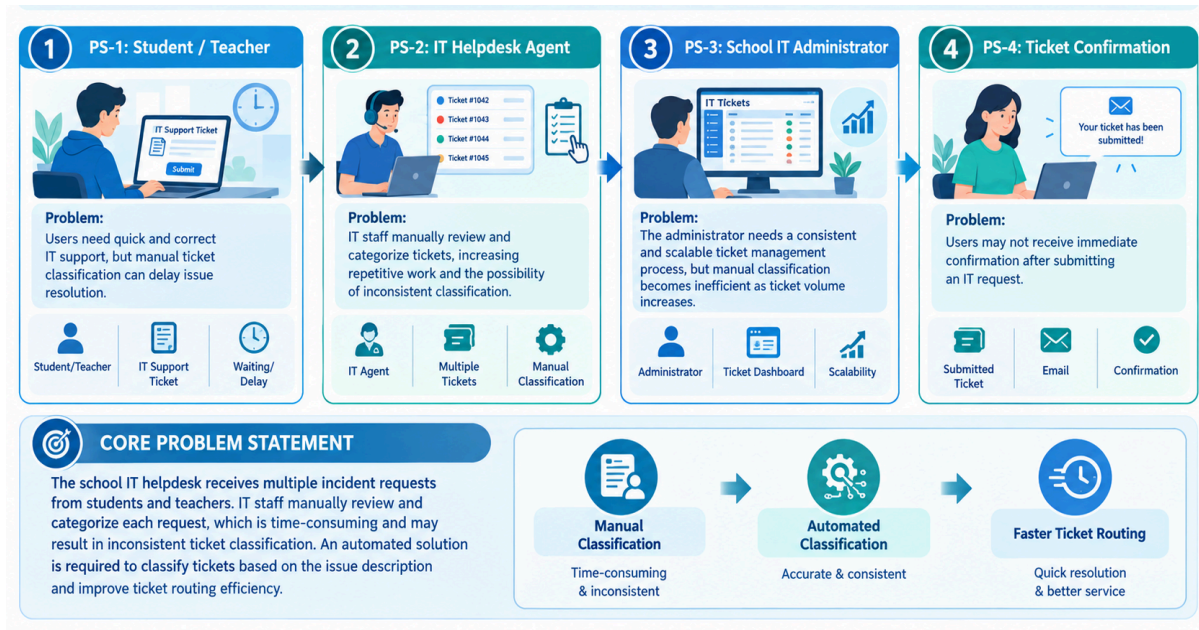

Brainstorming was conducted to identify possible solutions for improving the efficiency of the school IT helpdesk. The team focused on reducing manual ticket classification, improving ticket routing, minimizing human errors, and providing faster communication to students and teachers.

Different ideas were discussed, including manual classification improvements, keyword-based automation, Flow Designer automation, scripting, email notifications, and AI-based classification. The ideas were then grouped and prioritized based on ease of implementation, automation capability, maintenance, scalability, and suitability for a no-code ServiceNow solution.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Step-2: Brainstorm, Idea Listing and Grouping

Step-3: Idea Prioritization
