

User Acceptance Testing (UAT)

Date	28 September 2026
Team ID	SWTID-2026-2588
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	5

Project Overview:

Project Name: Auto Ticket Classification using Flow Designer

Project Description: A ServiceNow Flow Designer automation that automatically classifies newly created IT helpdesk tickets based on keywords in the Short Description/Description and assigns the appropriate Category and Subcategory.

Project Version: Version 1.0

Testing Period: 28 September 2026 to 3 October 2026

Testing Scope:

- Ticket creation in the Incident WorkFlow table.
- Automatic classification of Wi-Fi tickets as Network → Wi-Fi.
- Automatic classification of Projector tickets as Hardware → Projector.
- Automatic classification of Password/Login tickets as Access → Forgot Password.
- Automatic classification of Slow/Hanging tickets as Performance → Slow Computer.
- Validation of dependent Category and Subcategory values.
- Email notification to the caller after ticket processing.

Testing Environment:

Platform: ServiceNow

Application/Location: Incident WorkFlow table and Flow Designer

Credentials: Use authorized ServiceNow project credentials

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Create IT ticket	1. Open Incident WorkFlow. 2. Enter caller and ticket details. 3. Submit the ticket.	Ticket is created successfully and receives a ticket number.	Ticket created successfully.	Pass
TC-002	Wi-Fi ticket classification	1. Create a ticket. 2. Enter 'Wi-Fi not working' in the description. 3. Submit the ticket.	Category = Network and Subcategory = Wi-Fi.	Classified as Network → Wi-Fi.	Pass
TC-003	Projector ticket classification	1. Create a ticket. 2. Enter a projector-related issue. 3. Submit the ticket.	Category = Hardware and Subcategory = Projector.	Classified as Hardware → Projector.	Pass
TC-004	Password/Log in ticket classification	1. Create a ticket. 2. Enter a password/login issue. 3. Submit the ticket.	Category = Access and Subcategory = Forgot Password.	Classified as Access → Forgot Password.	Pass
TC-005	Slow/Hanging ticket classification	1. Create a ticket. 2. Enter a slow or hanging computer issue. 3. Submit the ticket.	Category = Performance and Subcategory = Slow Computer.	Classified as Performance → Slow Computer.	Pass

TC-006	Email notification	1. Create a valid ticket with caller email. 2. Allow the flow to execute. 3. Check the caller email.	Email notification is sent to the caller after processing.	Email notification sent successfully.	Pass
TC-007	Invalid/unknown keyword	1. Create a ticket with a description that does not match the configured keywords. 2. Submit the ticket.	Ticket is created without incorrect classification; no unrelated Category/Subcategory is assigned.	No incorrect classification observed.	Pass
TC-008	Multiple tickets	1. Create multiple tickets with different supported keywords. 2. Submit them separately. 3. Verify each ticket.	Each ticket is classified independently according to its matching keyword.	Tickets classified independently and correctly.	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
No bugs reported	No defects identified during UAT.	Not Applicable	None	Closed	All tested scenarios passed.

Sign-off:

Tester Name: _____

Date: 3 October 2026

Project Manager: _____

Product Owner: _____

Notes:

- Positive and negative ticket scenarios are included in the UAT test cases.
- Test results are recorded based on the expected Flow Designer classification behavior.
- No bugs were reported during the documented UAT scenarios.
- Final sign-off should be completed by the authorized project manager and product owner before deployment.
